Daniel Caesar

Creative Director: Jay Won
Designer/Developer: Caroline Kopsky

- Open to either multi page or single long page
- Have 5 main sections: home page, life and career, artistry, his 3 albums (*Freudian, Case Study 01, Never Enough*) , sources
- Want the home page and his albums page to contrast with other pages
- Albums page could either have separate pages/sections for each album or a single long flowing page
    - Should include track list, title, run time, other basic info about album
    - Nice to have option for user to play music on the page
- Home page should have basic info about Daniel Caesar (his name, his most popular songs, genre of music, etc)
- Overall clean and sleek design
- Mostly whites, blacks, blues for website colors
- Usage of photos throughout website
