Project Title: Daniel Caesar

I would like to build a multi-page website that provides more context towards the artist Daniel Caesar. I plan on having a navigation bar either on the top or the side. I will include information on Daniel Caesar's life and career, his inspirations, and his music, which I think will be enough to populate the website.

- Home page – Introduce some basic info and facts about Daniel Caesar. Maybe also give an overview on the music he has made and some of his most popular songs.
- Life and career
- Artistry – includes some of his inspirations, subject of his music
- His 3 albums – Will provide more in-depth details about each of his albums. Not sure if I want each album to be its own page, or if it would be better to have one long page for this section.
 - Freudian (2017)
 - Case Study 01 (2019)
 - Never Enough (2023)
- Sources – photos and websites used. https://en.wikipedia.org/wiki/Daniel_Caesar
